PROFILE

Frontend Developer with experience in React.js, focused on building scalable and high-performance web applications. Skilled in React, Next.js, TypeScript, and modern state management, with hands-on experience in API integration and dynamic UI development. Built a low-code form builder with features like conditional logic and real-time previews. Familiar with Angular fundamentals.

EDUCATION

Mulund College Of Commerce (Autonomous)

Mulund, India

Bachelor of Science in Computer Science

2021 – 2024

- CGPA : 8.75/10

SKILLS

Technical: JavaScript, ReactJS, Next.js, TypeScript, HTML, CSS, Tailwind CSS, React Flow, Responsive Web Design, Node.js & ExpressJS, Context API, React Router, ShadCN, MongoDB, Mongoose, Three.js, Framer Motion

Tools: Redux Toolkit, React Query, Git, Github, Vercel, Netlify, Firebase, Supabase

CERTIFICATIONS

- Build Responsive Real-World Websites with HTML and CSS (Udemy) – Dec'22 ([link](#))
- JavaScript Development Certification (Udemy) – May'23 ([link](#))
- ReactJS and NextJS Development Certification (Udemy) – Dec'23 ([link](#))

EXPERIENCE

Nablasol

Remote

Software Developer Intern

2024 – 2025

- Boosted performance of React.js applications by 25%, reducing load times and enhancing user experience.
- Integrated REST APIs into a Document Management System (DMS), ensuring 99% data accuracy across workflows.
- Engineered a dynamic workflow builder using React Flow, enabling teams to design and manage interactive workflows efficiently.
- Deployed production releases independently, achieving 99.9% uptime and cutting issue resolution time by 20%.
- Coordinated with the team to design intuitive workflows, ensuring a seamless and engaging user experience.
- Developed and launched a custom Wix-based website, delivering a fully 100% responsive and user-friendly design that met client requirements

Kyzer Software

Mumbai, Maharashtra

Frontend Developer

Dec 2025 – Present

- Developed a low-code dynamic form builder with conditional logic and multi-step validation, enabling flexible and configurable form creation.
- Integrated API-driven dynamic field population, improving data accuracy and reducing manual configuration.
- Optimized performance by reducing re-renders and modularizing components, improving responsiveness for large forms.
- Implemented undo/redo functionality, enhancing editing efficiency and preventing data loss.
- Working on a workflow/process designer using React Flow, implementing node management, edge configuration, and state handling.
- Built rich text editing and HTML-to-PDF generation for dynamic document creation.
